

Operational Best Practices	 In Place/ Effective	 In Progress/ Needs Work	 Absent/ Ineffective	N/A	Comments/ Plan for Action
Playground Safety City playgrounds must be designed, inspected, and maintained in compliance with the State of California requirements, which are described in <i>The Handbook for Public Playground Safety</i> and ASTM F187-95.					
A current playground equipment inventory exists for each playground.					
An annual playground audit is available for review and reflects equipment as stated in the inventory. The audit is conducted either by a Certified Playground Safety Inspector (CPSI) or personnel trained by a CPSI.					
Documented monthly inspections and repair records are available for review. Inspections are conducted and signed off by a CPSI or staff who was trained and overseen by a CPSI.					
Depending on frequency and intensity of use, weekly and/or daily inspection checklists are available for audit.					
For playgrounds that do not comply with accessibility requirements under the ADA, an action plan with time tables to bring the site into compliance is available for review.
